- Applications ⇧⌘A
- Utilities ⇧⌘U
- Recent Folders ▶
- Go to Folder... ⇧⌘G
- Connect to Server... ⌘K

Select your desktop so your menu items appear as they do in the picture above. Click on the Go menu. While the menu is showing, hold down the “Option” key and the Library folder should appear. Click on the Library folder to go to your user library.

Find and double click on Application Support. Scroll down and find the folder com.apple.TCC. Right click on the folder and select Rename. Add “_OLD” to the end of this folder and click off of it. Restart your computer and it should create a new folder for you. When you launch an app or a website that requires the camera or microphone, you should be prompted to “Allow” the camera or mic.

Check to make sure your mic and camera are allowed in Chrome. Click on the icon to the left of the URL bar. In this case it is a picture of a lock. Once selected you'll be able to see the settings for that specific website. You can also click on Site Settings to see the rest of the settings for that site or reset the cache and cookies
